WORK EXPERIENCE

Junior Full-Stack Developer

Katapult

Calgary, AB
Dec.2022 - Present

- Collaborated in the development of a Watermark service designed to complement the Ksign service enhancing document authenticity, using PHP.
- Identified and resolved Frontend (Blade, SCSS, Javascript) and Backend (PHP) bug issues in platform to ensure optimal functionality and performance.
- Designed and configured automated test result notification system in Javascript to identify failing tests run on daily Bitbucket pipeline.
- Played a key role in successfully transitioning the Company's new testing framework resulting in enhanced test efficiency & scalability.

Junior Developer

SimplyCast

Halifax, NS
Jan. 2021 - Apr 2021

- Improved Simply Cast application system stability by implementing bug fixes using Javascript and PHP.
- Used JavaScript and PHP to refactor inefficient existing software.
- Ran integration tests for functionality in the dev environment of the Simply Cast application.

Software Developer

MacDonald Dettwiler & Associates (MDA)

Halifax, NS
May 2020 - Aug. 2020

- Used Typescript to implement a sub-section in a management window in the TRITON application.
- Applied Angular framework to assist in the development and defect maintenance of the TRITON application.
- Operated within a Scrum methodology to prioritize tasks and requirements to complete user stories during sprints.

Junior Programmer Analyst

Public Service Commission of the Government of Canada

Halifax, NS
Sept. 2019 - Dec. 2019

- Developed automated test scripts using Selenium to check validity of applications in development.
- Scaled automated test scripts to increase time and memory efficiency.
- Wrote clear technical documentation for a new application, Katalon Studio, that was introduced to the ASD Application Division.
